RESEARCH

Collaboration between the natural and supernatural character in *The Tempest*

The Tempest explores the relationship between natural and supernatural characters, focusing on Prospero's control and power over both.

Using postcolonial theory, this paper examines his dominance, the collaboration among characters, and questions his moral authority and leadership.

Iona Potapov loneliness in "Misery"

Scholars like Dessner and Patrick discuss Iona's grief in "Misery," highlighting his son's death, social isolation, and class discrimination in Russian society.

However, they fail to prove the true cause of his loneliness, which this study argues stems mainly from the passengers' indifference using existential theory.
