This is a certificate provided by National Skills Development Authority(NSDA) for completing level- 4 Digital Marketing course.

PROJECTS

Inventory Management System

Developed a full-stack Inventory Management System to efficiently manage products, stock levels, suppliers, and inventory transactions. Built with Angular for a responsive frontend, Spring Boot for secure RESTful APIs, and MySQL for reliable data persistence. Implemented key features such as product and category management, stock in/out tracking, low-stock alerts, search and filtering, role-based access control, and reporting. Designed with a scalable architecture to support real-time inventory monitoring and streamlined business operations.

Inventory Management System app with Flutter

Developed a Flutter-based Inventory Management System using SQLite for local data storage, enabling efficient tracking and management of products, stock levels, and transactions. Implemented features such as CRUD operations, real-time stock updates, low-stock alerts etc.
